and in 2014 html 5.00
Was publish

Who made html?

HTML was created by Sir Tim
Berners-Lee

How to code with html?

Now just download Vscode

And follow these steps

Visual Studio Code

Now let us know how to make our first project

Open VScode

Make a new file
Make the file .htm or .html

Start type

Html element is like a sandwich see `<element name>`
most element has open tag and close tag

Like

`<open tag>`

`</close tag>`

4 main elements in HTML

`<html> </html>` that you put all code between it
`<head> </head>` that mean every thing from
opening tag to close tag is a head
`<title> </title>` that mean every thing in this
element is the name of page

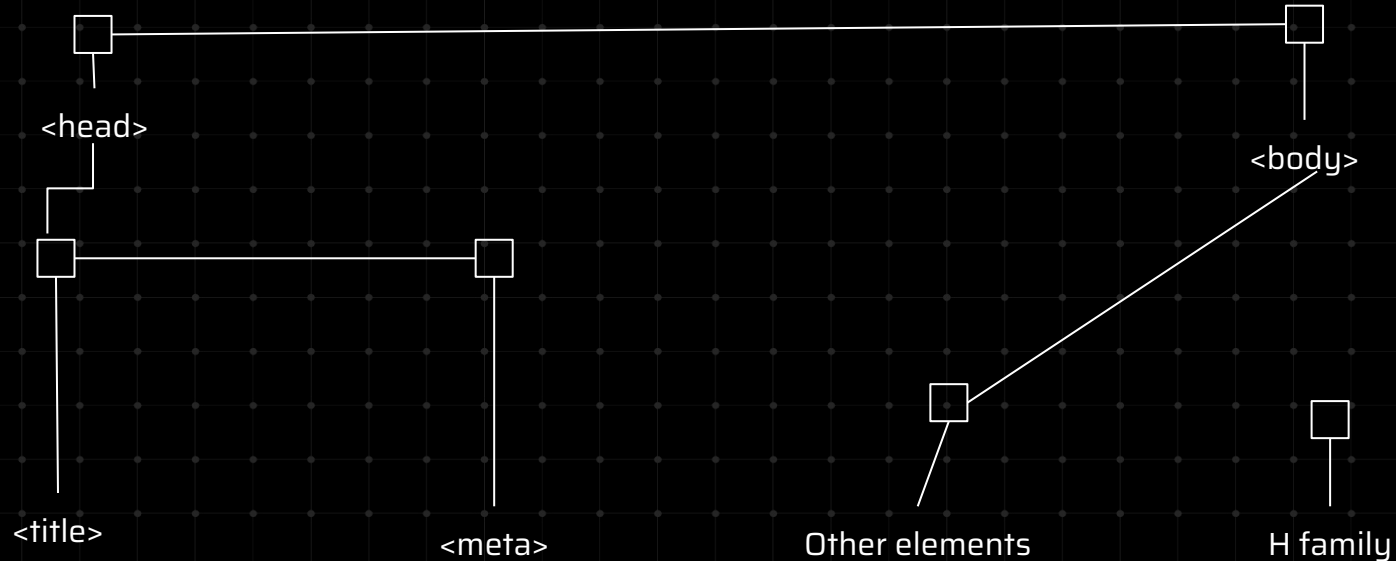

Now lets start our new trip

quiz
